# Muhammad Raziuddin

### Front-End Developer

## ABOUT ME

As a versatile developer, I specialize in HTML, CSS, and Bootstrap, and am improving my skills in JavaScript, PHP, MySQL, and Angular. My proficiency in backend technologies enables robust server-side functionality and efficient database management. With expertise in SQL, I optimize queries for performance and scalability, ensuring seamless data retrieval and manipulation. Additionally, I excel in working with JSON for seamless data exchange between frontend and backend systems. Whether crafting intuitive user interfaces or architecting scalable database structures, I bring a comprehensive skill set to every project.
